

CARE & STORAGE OF YOUR MANNEQUIN HEAD

STORAGE

- Avoid storing damp hair in plastic bags to prevent unpleasant odours from mould or mildew
- Avoid excessive temperatures, hot or cold. Do not leave hair in any area where extreme temperatures occur for long periods of time, such as cars or cabinet dryers

CLEANSE/CONDITION

- Shampoo using a non-alkaline shampoo and lukewarm water
- Avoid tangling by running fingers through hair from scalp to ends
- Rinse thoroughly with lukewarm water
- Apply a leave-in conditioner or finishing rinse
- Detangle with a large tooth comb; begin at the nape and comb from scalp to ends in a downward motion
- Rinse again (optional)

CHEMICAL SERVICES

- Strand tests are recommended to preview results of all chemical treatments
- The normal temperature range for shampooing, conditioning, and/or thermal design is 130 – 170 degrees C
